SULPHUR

FOR INDUSTRY

passionag.com

**PASSION
SULPHUR**

Passion Sulphur provides premium-grade sulphur tailored to meet the diverse needs of modern industries globally.

Sulphur plays a vital role across a wide range of applications, from chemical manufacturing and petroleum refining to food production, wastewater treatment, rubber processing, and tyre manufacturing. Its versatility and proven effectiveness make it an essential component for industries striving for productivity and sustainability.

With over 30 years of expertise and a commitment to exceptional customer service, Passion Sulphur is a trusted partner in the supply chain of this indispensable raw material.

Passion Sulphur products deliver measurable benefits:

- Enhanced product quality
- Increased operational efficiency
- Reduced environmental footprint
- All Passion Sulphur products are high purity and consistency to support reliable quality control during industrial processes.

Designed to suit a variety of industrial requirements, the extensive range of Passion Sulphur products includes powders, pastilles, rolls and flakes.

SULPHUR POWDERS

Available in a range of particle sizes to suit a variety of uses, Passion Sulphur powders have a high purity and a highly uniform particle size for reliable quality in industrial and agricultural processes.

In addition to the mesh sizes available, some sizes are also available with additives present to improve flowability, handling and dispersal characteristics for specific industrial applications:

Mesh sizes (ASTM)	Additives available
120, 200, 300, 325	Oil and Magnesium Carbonate (MC)

Pack sizes available: 25kg bags.

SULPHUR PASTILLES

Produced using drop-forming technology, the process creates a semi-spherical form with a flat base, ensuring a consistently high-purity product with very low moisture content. Our sulphur pastilles are very carefully produced to avoid sulphur dust in the product by ensuring that the pastilles are perfectly formed in the manufacturing process, eliminating 'fines' in the end product.

Due to their form, pastilles are classed as "non-restricted" or "non-hazardous" in relation to warehouse storage and transport by road or sea, which is an advantage for handling and moving the product.

Pack sizes available: 15kg – 1,250kg bulk bag.

Custom pack sizes available on request.

SULPHUR ROLLS

This specific form of sulphur is preferred in certain industries where generation of sulphur dioxide is required in a particular way. Examples include the steel industry, and in certain chemical processes, where a specific burn time and intensity is required.

The rolled form of sulphur is classed as "non-restricted" or "non-hazardous" in relation to warehouse storage and transport by road or sea.

Pack sizes available: 25kg cartons.

SULPHUR FLAKES

The flaked form of solid sulphur is preferred in some applications where it is being used to generate sulphur dioxide, such as in glasshouses for fumigation as a traditional way to control certain insect pests.

Flaked sulphur is classed as "non-restricted" or "non-hazardous" in relation to warehouse storage and transport by road or sea.

Pack sizes available: 25kg bags.

**PASSION
SULPHUR**

AT PASSION SULPHUR, WE ARE DEDICATED TO ADVANCING SUSTAINABLE PRODUCTIVITY.

Passion Sulphur products are manufactured with exacting standards to ensure consistently high purity and uniform sizing, delivering reliable outcomes. Designed to meet the stringent requirements of industries such as food, chemicals and electronics, our products provide dependable performance for precision manufacturing and production needs.

KEY PROPERTIES OF SULPHUR:

Purity Minimum:	99.5% — Arsenic, Selenium and Tellurium free
Melting point:	119°C
Flash Point (pure S):	188°C
Auto Ignition Temp:	232°C

At Passion Sulphur, we combine industry expertise with exceptional service to help you achieve your goals with confidence.

We offer flexible delivery options and customisable pack sizes to suit your specific needs, all backed by our expert technical support and dedicated customer service team.

Our team has over 30 years' experience distributing high quality Sulphur for industry and agriculture internationally.

With over 30 years of experience in delivering high-quality sulphur for industrial and agricultural applications worldwide, Passion Sulphur has become a trusted name in the industry. When you choose us, you're not just buying a product – you're gaining a reliable partner dedicated to supporting your success.

Our strong, long-standing relationships with suppliers and loyal customers reflect the reliability, trust, and quality that have been the foundation of our business for decades.
